

Captain

An innovative tool catering for modern work at height techniques. Carefully designed to aid stability and positioning during technical jobs.

The Captain is a self-locating, high strength hook that has been designed and tested with the trademark attention to detail that is synonymous with DMM. The pivoting D shackle helps destabilise the hook if presented in the wrong orientation and interacts beautifully with the carefully sculpted hook form to ensure reliable location on the anchor, specifically for connecting to remote anchors and facilitate controlled sideways movement - traversing.

Once in place, the quality engineering ensures a rated strength of 23kN (dependent on the anchor). When the job is done, the Captain racks superbly on a harness, minimising the chances of snagging. Perfect for working between or within complex structures.

CAPTAIN V02

PRODUCT INFORMATION

FEATURES

- Self-righting/locating
- High strength 23kN rating (Not PPE)
- Hot forged hook body
- Snag-free racking with 15mm eye
- Customisable nose weighting
- Textile compatible hot forged D shackle attachment point
- Grease port
- Max anchor diameter 90mm
- Bark friendly hook design
- Also available complete with rope and bag

TECH SPECS

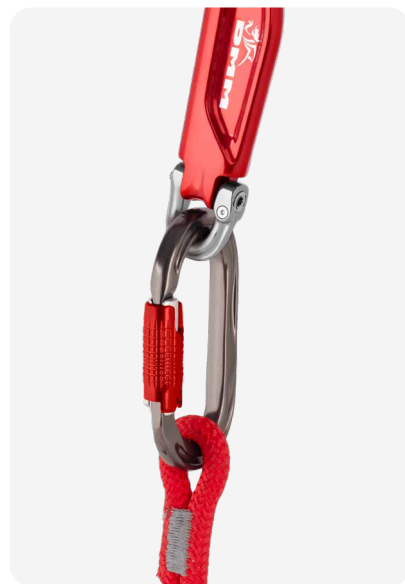

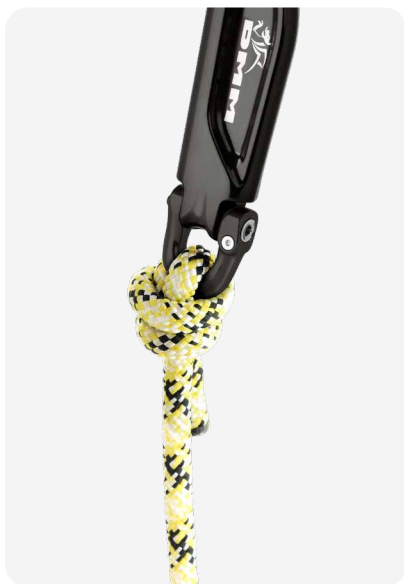

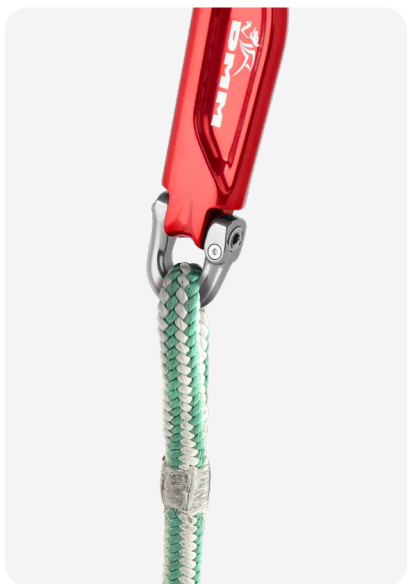

DESCRIPTION	PRODUCT CODE	COLOUR	DIMENSION	WEIGHT (G)	MBS
Captain	TH200	Red	225 x 155 x 20mm	398g	23kN (not PPE)
Captain	TH200MG	Matt Grey	225 x 155 x 20mm	398g	23kN (not PPE)
Captain Kit	TH200-KIT	Red	310 x 150 x 190mm	1757g	23kN (not PPE)
Captain Kit	TH200MG-KIT	Matt Grey	310 x 150 x 190mm	1757g	23kN (not PPE)

APPLICATION

CAPTAIN V02

ATTACHMENT METHODS

› Splice

› Knot

› Carabiner
